**Summary:**

The Illinois State Statute that establishes the user fee collected by the Recorder's Office for the services provided by Geographic Information Systems (GIS) Department (55 ILCS 5/3-5018) allows for the fee to be increased up to the level that would recover the cost of providing the services according to the cost determined by an approved cost study. Such a cost study was conducted by Bradford J Townsend, Financial and Strategic Management. The results of the study indicated that the cost of services provided by the GIS Department were not being recovered by the current fee. Therefore, it has been determined it is necessary to increase the current GIS Fee collected in the Recorder's Office from twenty-six dollars (\$26.00) to forty-eight dollars (\$48.00) in order for the GIS Department to more adequately recover the cost of those services. Collections at that rate should temper the multi-year trend of dwindling fund balance and ensure sufficient income stream to maintain the excellent County GIS environment for the next 6 or 7 years.
