Contact:

Jodie Wollnik, Director KC Environmental & Water Resources

Budget Information:

Was this item budgeted? Yes	Appropriation Amount: \$499,607
If not budgeted, explain funding source: N/A	

Summary:

The County of Kane and Forest Preserve District of Kane County are working together to complete streambank and stream channel stabilization along the segment of Geneva Creek which passes through the south end of the Kane County Government Center property and into the Gunnar Anderson Forest Preserve property on its way to the Fox River. On September 15, 2023, the County of Kane solicited proposals from qualified firms to design and construct streambank and stream channel improvements for the properties. Two proposals were received on November 15, 2023 by the County and a review committee comprised of staff from both the County of Kane and the Forest Preserve District of Kane County reached a consensus that ENCAP, Inc. was the most qualified firm and their proposal should be accepted. The project is divided into five priority sections, which will be completed based upon the amount of funds which can be designated towards the project. County of Kane will pay for \$200,000 of the project cost through Wetland Fee-in-Lieu funds and the Forest Preserve District of Kane County has agreed to pay \$50,000. The cost for completing Priority Section 1 and Priority Section 2 in ENCAP, Inc.'s proposal is \$243,342.00. Additional funding is being sought from the Kane County Riverboat Fund in the amount of \$250,000 to potentially authorize ENCAP, Inc. to complete Priority Sections 3,4, and 5. The total maximum amount of the contract with ENCAP, Inc. is \$499,607.00 for all five priority sections.
