### **Summary:**

This resolution authorizes a three-year enterprise agreement with ESRI (Environmental System Research Institute, Inc.) for desktop and server platforms used by the Kane County GIS-Technologies Department. ESRI software is critical for geographic information system (GIS) operations throughout the County of Kane.

The agreement will be funded from the GIS-Technologies budget which is Special Revenue, with the total cost for the three-year contract not to exceed \$940,000. The annual payments are as follows: \$280,000 in FY2025, \$320,000 in FY2026, and \$340,000 in FY2027. The purchase is in compliance with Kane County Code Section 2-216, which allows for the procurement of proprietary software and related services without competitive bidding when the software is deemed essential for county operations. The resolution also acknowledges the necessity of appropriating funds for these services beyond the current budget year.
